⑥: Charging Lighting

2.Power On
Press Module on/off button (①) once,
Module on/off Lighting (⑤) is on,
means power on.

3.Pairing
Once powered, it's on pairing status within 60 seconds.

→ Hold on Module on/off button (①)
→ You will hear bleep sound from the Module,
means it is paired up with the bed successfully.

4.AI Anti-snore
Installation distance
This module can monitor the snore within two meters, it's small, you can just place or install on the bed.

5.AI Anti-snore Function
Once paired successfully:
(1) If the module monitors snore within 15s, the bed will raise to Anti-Snoreposition automatically.
(2) When the bed is on Anti-snore status,the Module does not monitor snore for 1min, the bed goes back to flat positionautomatically.

6.Attention
Ensure the Module is full changed and sensitive monitoring,
please turn it on before sleeping.
And turn off if you do not needs Anti-snore and voice control.
